

GENUI

Operating Principles for Impact Management Disclosure Statement

— 2024/25 —

Operating Principles for Impact Management Disclosure Statement

- On April 12, 2019, the International Finance Corporation, together with a core group of external stakeholders, launched the Operating Principles for Impact Management. The objective of this effort is to establish a common discipline and market consensus around the management of investments for impact.
- GENUI GmbH (the “Signatory”, the “Manager”) hereby affirms its status as a Signatory to the Operating Principles for Impact Management (the “Impact Principles”).
- This Disclosure Statement applies to the following assets (the “Covered Assets”):
 - GENUI II GmbH & Co. geschl. InvKG (“GENUI II”)
 - GENUI III GmbH & Co. geschl. InvKG (“GENUI III”)
- The total assets under management¹ in alignment with the Impact Principles is US\$ 1,399 million as of December 31, 2024.

Signed:

Name of Institution: GENUI GmbH

Authorised Representatives: Dr Max Odefey, Melanie Büsing

Title: Managing Directors

Date: March 17, 2025

Strategic Intent (I/II)

Principle 1

Define strategic impact objective(s), consistent with the investment strategy.

The Manager shall define strategic impact objectives for the portfolio or fund to achieve positive and measurable social or environmental effects, which are aligned with the Sustainable Development Goals (SDGs), or other widely accepted goals. The impact intent does not need to be shared by the investee. The Manager shall seek to ensure that the impact objectives and the investment strategy are consistent; that there is a credible basis for achieving the impact objectives through the investment strategy; and that the scale and/or intensity of the intended portfolio impact is proportionate to the size of the investment portfolio.

Incorporation in GENUI investment process

- Over the course of establishing our second fund generation (GENUI II), we set ourselves the goal to encourage our portfolio companies to contribute to accelerating the transition to a more sustainable economy and society. Certified as a B Corp ourselves, GENUI's strategic sustainability objective is to achieve positive and measurable social or environmental effects. Focusing on the German speaking region (DACH) GENUI is a mid-market buyout impact investor focusing on businesses that contribute to advancing what GENUI regards as among society's central tasks (three themes): good health, digitalisation and environmental transformation. Further, GENUI supports leading sustainability initiatives and principles (e.g. UN PRI, UN GC, TCFD, Bundesinitiative Impact Investing, SBTi) promoting engagement and advocacy for a transition towards net zero.¹
- Within those three investment themes GENUI's objective is to pursue alignment of its investments with the United Nations Sustainable Development Goals focusing on SDG 3 (Good Health), SDG 5 (Gender Equality), SDG 7 (Affordable and Clean Energy), SDG 8 (Decent Work and Economic Growth), SDG 13 (Climate Action) and SDG 16 (Peace, Justice and Strong Institutions).
- To achieve those impact objectives GENUI has set quantitative and qualitative goals as outlined in the [GENUI Sustainable Investing Framework](#) and monitored via GENUI's set of impact and ESG KPIs with results made transparent in [GENUI's annual sustainability report](#) publicly available on the GENUI website.

Strategic Intent (II/II)

Principle 2

Manage strategic impact on a portfolio basis.

The Manager shall have a process to manage impact achievement on a portfolio basis. The objective of the process is to establish and monitor impact performance for the whole portfolio, while recognising that impact may vary across individual investments in the portfolio. As part of the process, the Manager shall consider aligning staff incentive systems with the achievement of impact, as well as with financial performance.

Incorporation in GENUI investment process

- Both at GENUI management company level and at the portfolio companies, GENUI encourages initiatives for achieving tangible outcomes. GENUI ensures a systematic approach in assessing and measuring impact on beneficiaries/stakeholders on an ongoing basis along leading norms and principles. GENUI primarily invests in business models which inherently have a positive social or environmental impact. A quantitative and qualitative measurement of the individual investments' social impact is carried out on an annual basis by an independent specialist social impact advisory firm. The quantitative methodology to derive a social impact (Net Value to Society) is based on available evidence from third-party academic research which translates the social outcomes into economic terms representative for the business model or sector of each portfolio company. Furthermore, an assessment and scoring of the positive impact of the investments' business model along Impact Frontiers norms is conducted by an independent specialist social impact advisory firm. To monitor impact on a portfolio level, the impact evaluation along the Theory of Change and a set of impact KPI is aggregated as part of the assessment.¹
- GENUI encourages that ESG responsible persons at portfolio companies are nominated at least at C-level. Core ESG objectives include (i) achieving carbon footprint measurement, reduction and compensation of the unavoidable footprint, (ii) realising equal pay and increasing gender diversity in management board and (iii) implementing robust governance mechanisms and policies during GENUI's ownership. Initiatives are consistently tracked through a continuous dialogue with portfolio companies and monitored and reported based on GENUI's set of impact and ESG KPIs.
- As part of the annual employee review GENUI conducts anonymised 360° feedback, which forms the basis for the employees' feedback, performance and compensation reviews. This also takes into account an individual's contribution to impact and ESG value creation and management of ESG risks across the portfolio. Further, GENUI encourages its portfolio companies to conduct a 360° employee feedback.

Note: 1) For details on methodology and approach please refer to page 24 of the 2024 GENUI Sustainability Report.

Origination & Structuring (I/III)

Principle 3

Establish the Manager's contribution to the achievement of impact.

The Manager shall seek to establish and document a credible narrative on its contribution to the achievement of impact for each investment. Contributions can be made through one or more financial and/or non-financial channels. The narrative should be stated in clear terms and supported, as much as possible, by evidence.

Incorporation in GENUI investment process

- GENUI advises portfolio companies with the expertise of the investment team and GENUI's network of entrepreneurs in their roles as advisory board (GENUI Entrepreneurs Board) members: The GENUI Entrepreneurs¹ offer portfolio companies their advice in a non-executive role, including on how to promote "great" cultures and achieve significant growth and operational improvements. The involvement of the GENUI Entrepreneurs who have driven to live Good Entrepreneurship lends specific credibility to GENUI's objective of being a "good home" for businesses.
- Further, GENUI's dedicated Impact & ESG team brings to the table the technical advice, knowledge sharing on regulatory surroundings, industry standards and initiatives promoting the portfolio companies' impact and ESG activities, accompanied by specialised external ESG and social impact consultancies.
- An annual review and assessment includes the evaluation of GENUI's advice on the achievement of impact, including to what extent GENUI encourages management to adopt of higher environmental, social and governance standards during its ownership. When investing the GENUI funds/capital (financial additionality) GENUI strives to invest only in management teams that share our values of "Good Entrepreneurship" including the impact and ESG approach manifested via the investment documentation.
- In addition to the performance measurement through GENUI's set of impact and ESG KPIs, GENUI's impact analysis approach aligns with Impact Frontiers norms' "Five Dimensions of Impact" and the Global Impact Investing Network (GIIN) incl. the IRIS+ system. Additionally, GENUI uses a conservative approach to estimate the social impact / Net Value to Society created by select portfolio companies.²

Note: 1) The investment team is supported by exceptional entrepreneurs, successful business leaders and investors with deep industry or functional expertise and unique access to networks in a variety of sectors and industries. 2) For details on methodology and approach of the frameworks please refer to pages 23-25 of the 2024 GENUI Sustainability Report.

Origination & Structuring (II/III)

Principle 4

Assess the expected impact of each investment, based on a systematic approach.

For each investment the Manager shall assess, in advance and, where possible, quantify the concrete, positive impact potential deriving from the investment. The assessment should use a suitable results measurement framework that aims to answer these fundamental questions: (1) What is the intended impact? (2) Who experiences the intended impact? (3) How significant is the intended impact? The Manager shall also seek to assess the likelihood of achieving the investment's expected impact. In assessing the likelihood, the Manager shall identify the significant risk factors that could result in the impact varying from ex-ante expectations.

In assessing the impact potential, the Manager shall seek evidence to assess the relative size of the challenge addressed within the targeted geographical context. The Manager shall also consider opportunities to increase the impact of the investment. Where possible and relevant for the Manager's strategic intent, the Manager may also consider indirect and systemic impacts. Indicators shall, to the extent possible, be aligned with industry standards and follow best practice.

Incorporation in GENUI investment process

- GENUI focuses on businesses in the German speaking region (DACH) from its strategic investment themes (see Principle 1) and has defined a list of exclusion criteria for certain industries (e.g. arms, tobacco, gambling etc.) and will not invest in companies from the fossil gas and nuclear energy sectors or suspected of unethical or illegal business practices ("negative screening"). As part of the investment evaluation in the pre-deal phase, GENUI together with external consultancy firms conducts a due diligence on ESG-related risks and opportunities applying the SASB Materiality Map which visually reveals how general sustainability issues manifest across industries.¹
- Starting 2021, the due diligence also comprises a high-level assessment of the most material positive and negative externalities related to ESG factors (including socio-economic factors and a high-level climate-related risk scenario analysis in accordance with the Task Force on Climate-related Financial Disclosures (TCFD) guidelines). It is GENUI's strategic objective that each investment contributes to people and planet by at least (i) becoming carbon neutral (CO₂e footprint = 0) and set-up a carbon balance assessment (in accordance with GHG protocol) incl. definition of adequate reduction measures, (ii) achieving equal pay (gender pay gap = 0), and (iii) promoting diversity in management board. Risks and objectives of achieving the expected impact are therefore continuously monitored via the GENUI ESG reporting KPI set starting right after investment.²
- Starting 2024, an impact due diligence comprising the alignment of the investment with selected SDG, analysing the business model along the Theory of Change and scoring the positive impact along the Impact Frontiers' norms is conducted by an independent specialist social impact advisory firm. To monitor impact over time, the impact evaluation further quantifies the net value to society / social impact (where appropriate) and derives a set of core company-specific impact KPI as part of the assessment.²

Note: 1) Furthermore, the good governance assessment with respect to sound management structures, employee relations, remuneration of staff and tax compliance is conducted by independent advisory firms (ESG, legal and tax due diligence). 2) For portfolio case studies, methodology and approach please refer to the 2024 GENUI Sustainability Report.

Origination & Structuring (III/III)

Principle 5

Assess, address, monitor, and manage potential negative impacts of each investment.

For each investment the Manager shall seek, as part of a systematic and documented process, to identify and avoid, and if avoidance is not possible, mitigate and manage Environmental, Social and Governance (ESG) risks. Where appropriate, the Manager shall engage with the investee to seek its commitment to take action to address potential gaps in current investee systems, processes, and standards, using an approach aligned with good international industry practice. As part of portfolio management, the Manager shall monitor investees' ESG risk and performance, and where appropriate, engage with the investee to address gaps and unexpected events.

Incorporation in GENUI investment process

- At GENUI, overall responsibility for sustainability lies with a GENUI founding partner and managing director and the Chief Impact & Client Relations Officer, reflecting its strategic importance for GENUI. The dedicated GENUI impact and ESG team advises and monitors portfolio companies on impact and ESG-related matters.
- Furthermore, in alignment with the EU's Sustainable Finance Disclosure Regulation (SFDR), as amended from time to time, sustainability risk management is embedded in the way GENUI seeks to originate investments, make investment decisions and in ongoing portfolio management.
- GENUI commissions external due diligence assessments of principal adverse sustainability impacts and good governance aspects¹ by independent specialist advisory firms. Where due diligence uncovers material problem areas, GENUI assesses whether these can be successfully mitigated during GENUI's ownership, and if so, management devises a corresponding action plan. If not, this will constitute a reason for GENUI not to invest in the company.
- Pre-transaction, GENUI seeks buy-in from management to implement (i) ESG objectives incl. monitoring and reporting according to GENUI's set of ESG KPIs, as reflected in transaction documentation, and (ii) identified ESG actions post-transaction. Starting with the GENUI III fund generation, (i) management compensation is linked to additional impact KPI, and (ii) commitment to climate action and target setting via the Science Based Targets initiative (SBTi) as well as equal pay, DEI principles and good governance is mandatory.
- At portfolio company advisory board level (GENUI Entrepreneurs Board), progress is reviewed at least annually, and management identifies improvement actions for the subsequent period, including those required to address potential gaps in ESG systems, processes and standards (e.g. based on pre-investment research, due diligence and materiality findings, performance monitoring findings). To assess potential ESG gaps GENUI adheres to the SASB Materiality Map.
- To ensure that ESG risks and potential negative effects of an investment can be effectively monitored, management implements adequate disclosure channels and monitoring frameworks at the portfolio companies, including: dedicated ESG responsible person(s) to monitor ongoing compliance with ESG-related guidelines; robust compliance mechanisms and policies; and the ESG incident reporting process.²

Portfolio Management

Principle 6

Monitor the progress of each investment in achieving impact against expectations and respond appropriately.

The Manager shall use the results framework (referenced in Principle 4) to monitor progress toward the achievement of positive impacts in comparison to the expected impact for each investment. Progress shall be monitored using a predefined process for sharing performance data with the investee. To the best extent possible, this shall outline how often data will be collected; the method for data collection; data sources; responsibilities for data collection; and how, and to whom, data will be reported. When monitoring indicates that the investment is no longer expected to achieve its intended impacts, the Manager shall seek to pursue appropriate action. The Manager shall also seek to use the results framework to capture investment outcomes.

Incorporation in GENUI investment process

- Quantitative measurement of the investments' social impact (Net Value to Society)¹ is conducted based on third-party research and is complemented by a scoring of the positive impact of the investments' business model along the Impact Frontiers norms' "Five Dimensions of Impact" and alignment with selected SDG. Both the measurement and assessment (incl. an evaluation of the limitations of the applied methodologies) are carried out by an independent specialist advisory firm² based on portfolio data provided by GENUI and its portfolio companies and annually reviewed. GENUI has engaged an external assurance and verification company, to provide independent assurance of the social impact (net value to society, in €m) for selected GENUI II/III portfolio companies on an annual basis.
- Impact and ESG initiatives are consistently tracked across the portfolio by the GENUI Impact & ESG team based on GENUI's set of impact and ESG KPIs accessible to portfolio companies via third-party software and made transparent in the GENUI's annual sustainability report publicly available on the GENUI website. The usage of a dedicated ESG software improves the data collection process and data quality (audit trail) while allowing customised surveys, independent analysis and a standardised approach in comparing and editing the information provided by portfolio companies.³ Furthermore, starting 2024, a set of core company-specific impact KPI is tracked on a quarterly or annual basis.⁴
- While the GENUI Impact & ESG team maintains a dialogue with each of the portfolio's ESG teams, wider knowledge sharing and exchange is also provided via the bi-annual ESG portfolio roundtable. At portfolio company advisory board level (Entrepreneurs Board), progress is reviewed at least annually, and management identifies improvement actions for the subsequent period.

Impact at Exit (I/II)

Principle 7

Conduct exits considering the effect on sustained impact.

When conducting an exit, the Manager shall, in good faith and consistent with its fiduciary concerns, consider the effect which the timing, structure, and process of its exit will have on the sustainability of the impact.

Incorporation in GENUI investment process

- The impact and ESG initiatives achieved (e.g. impact on stakeholder/beneficiaries, positive climate action, diversity, gender equality and social impact) at a portfolio company during GENUI's ownership should be built upon during new ownership. Accordingly, GENUI considers whether a potential future investor is interested in continuing a portfolio company's achievements, taking into account factors such as:
 - Potential concerns over the business integrity of the buyer
 - Buyer's reputation and track record with respect to impact and ESG matters
 - Whether the investor is committed to principles of responsible investing
 - Investor's plans for the portfolio company with regard to ESG factors and achieved impact

Impact at Exit (II/II)

Principle 8

Review, document, and improve decisions and processes based on the achievement of impact and lessons learned.

The Manager shall review and document the impact performance of each investment, compare the expected and actual impact, and other positive and negative impacts, and use these findings to improve operational and strategic investment decisions, as well as management processes.

Incorporation in GENUI investment process

- GENUI's set of impact and ESG KPIs serves as a basis for reviewing the performance of each investment with regards to the achievement of expected, i.e. targeted impact, with results made transparent in GENUI's annual sustainability report publicly available on the GENUI website. This includes an assessment of whether core impact as well as ESG objectives such as climate action and measures to promote gender equality (see Principles 1 & 2) have been realised, and whether the positive social impact expected (see Principle 6) has been achieved. The annual sustainability report is shared with the portfolio companies' management and ESG teams and discussed in the ESG Portfolio Roundtable, a forum for exchange of best practices and feedback on processes and initiatives.
- GENUI regularly reviews the GENUI Sustainable Investing Framework to improve operational and strategic investment decisions as well as management processes, and to identify new impact and ESG initiatives.
- With this in mind, GENUI has established the GENUI LP Sustainability Council, an advisory body comprising selected GENUI investors' ESG representatives, that comes together on a semi-annual basis to discuss potential improvement measures and industry best practice. Further, GENUI shares experiences and lessons learned via industry working groups or participating in relevant panel discussions and events.

Independent Verification

Principle 9

Publicly disclose alignment with the Impact Principles and provide regular independent verification of the alignment.

The Manager shall publicly disclose, on an annual basis, the alignment of its impact management systems with the Impact Principles and, at regular intervals, arrange for independent verification of this alignment. The conclusions of this verification report shall also be publicly disclosed. These disclosures are subject to fiduciary and regulatory concerns.

Incorporation in GENUI investment process

- We place strong emphasis on measurement and transparent reporting. This disclosure document constitutes our public disclosure of alignment with the Operating Principles for Impact Management.
- GENUI discloses the social impact calculations and assessment in the annual sustainability report (Net Value to Society in €m, including a summary of the estimated social impact for the period covered by the report). The quantitative measurement of the individual investments' social impact is carried out by independent specialist advisory firm Value for Good GmbH.
- GENUI has engaged ERM Certification and Verification Services Limited ("ERM CVS"), an external assurance and verification company, to provide independent assurance of the social impact KPI (Net Value to Society, in €m) for selected GENUI II/III portfolio companies for the reporting period ending 2024, December 31, as disclosed in the 2024 GENUI Sustainability Report.
- Further, GENUI has engaged Tameo Impact Fund Solutions SA ("Tameo") to provide limited assurance of the alignment of GENUI's impact management system for the reporting period 2024, January 1 to December 31, as summarised in this Disclosure Statement, with the Operating Principles for Impact Management (February 2019, June 2021 updated version).
- Tameo issues an assurance report on the basis of the engagement agreed with GENUI GmbH. The assurance engagement has been performed for the purpose of the GENUI GmbH and the report is solely intended to inform GENUI GmbH as to the results of the assurance engagement and must not be used for purposes other than those intended. The report is not intended to provide third parties with support in making (financial) decisions. Tameo's independent Assurance Statement related to this assurance engagement is available [here](#). The next publicly available limited assurance engagement is planned for the reporting period 2027.
